# Illinois College

---

What kind of education will I get at Illinois College? If one of your students asked you that, what would you tell them?

This has come up a lot lately so I thought I'd reach out and pass along a few things that make IC the complete academic experience:

- IC is all about innovation. Everything we do is intended to help students “Graduate Ready.” We have a lot of great programs to challenge our students and prepare them for a fast-changing working world. Our “BLUEprint” program makes sure students graduate with the skills they’ll need to be successful. We stress “active learning” like service learning projects in the community, internships, student-faculty research, and study abroad.
- And I know you’ll love this part: Our “Finish in 4” guarantee means students stay on track and graduate in four years. That means no wasted time or money.
- Small class sizes mean students build strong relationships with their professors, and the professors mentor them through graduation. It also means classes tend to be more active, with discussions, activities, and group projects.

That’s the Illinois College education in a nutshell.

Please reply back and let me know you received this, and if you have questions about it, I’m all ears.

Thank you,

Emily Smith  
Senior Admission Counselor
